Introducing L3 Series Software. Reduce Costs. Improve Efficiency.

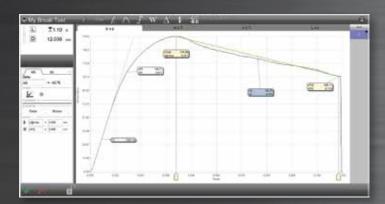

Material Testing Made Easy.

CREATE single and multi-stage tensile, compressive, shear, flexural, cyclic and creep tests on everything from metals to elastomers using international testing standards and methods. Incorporate formulas, command logic and even digital and analog I/O with our all-new single and twincolumn material testing frames with load capacities from 500N to 50kN.

PERFORM your L3 test setups with confidence, precision, accuracy and repeatability. L3 Series is ideal for the research scientist, quality engineer and testing technician. Get answers you can trust for your simple or complex testing applications.

ANALYZE your L3 results using a suite of graphical analysis methods. Find individual stress, strain, load and distance results; determine elastic modulus, tensile, bulk and yield strength; find delta results within your test data, a single test, or compared to tests in a batch. Get the result you need with a touch on our L3 all-in-one work station.

MANAGE your L3 results with comprehensive data acquisition and reporting. Interface with your existing statistical process control application seamlessly. And with a true data sampling at 2000Hz, capture all of the data you need for detailed analysis.

25 Dial Indicators

- Offered with lug on center back, 1/4" long radius contact point, and balanced or continuous reading dials
- Models up to .250" in range furnished with case stem cap to accommodate lever control
- . Models .500" and 1" range furnished with top lift feature
- · Unbreakable crystal
- · Hardened stainless steel stem

647 Dial Comparator

- · Effective non-shock mechanism
- · Pinions and shafts of the movement are jeweled
- · After removal of the safety cap the adjustment screw on top of the case allows simple and safe zero setting of the instrument over the total measuring
- · A safety cap prevents unintentional turning of the fine

2900 Electronic Indicators

• True Absolute Sensor Technology – remembers position and zero set point even during battery replacement. Cannot be "over-sped" into failure

• Intuitive design and layout - easy to learn and use

· Positive, tactile-feel button activation

• IP67 protection against dirt, dust water and coolant to withstand hostile shop environments
