

The Sol Vision System implements new technologies to provide speed and accuracy on a reliable and affordable measuring machine. The Sol bridges the gap between manual and automated measurement systems.

A programmable 19.5x zoom (6.5x optical and 3x digital), non-linear compensation (optics and stage), advanced lighting, and part program compatibility make the Sol the most advanced machine in its class.

Micro-Vu's InSpec Metrology Software drives the Sol in addition to manual, vision, and multisensor systems. InSpec's point-andclick measuring and proprietary edge detection simplify demanding measurement applications.

PRECISION MEASUREMENT SYSTEMS

MANUAL VISION SYSTEM

Model	Sol 161	Sol 311
Measurement Capacity	160x160x160mm (6.2"x6.2"x6.2") 10kg (22lbs)	315x315x160mm (12.4"x12.4"x6.2") 10kg (22lbs)
Machine Dimensions	545x705x775mm (21.5"x27.5"x30.5") 55kg (120lbs)	1084x718x1029mm (43.4"x28.7"x41.2") 150kg (330lbs)
Scale Resolution	1.0 μm	1.0 µm
XY Accuracy*, E₂	3.2+L/200	4.5+L/150
Z Accuracy*, E₁	2.8+L/100	2.8+L/100
Zoom Range	19.5:1	19.5:1
(Optical , Digital)	(6.5:1, 3:1)	(6.5:1, 3:1)
On-Screen Zoom Range	20x - 360x to 40x - 720x	20x - 360x to 40x - 720x

Programable Zoom

The zoom lens is motorized. InSpec automatically drives the lens to the programmed zoom stops. Parts can be measured faster and more accurately.

Machine

Precision X, Y, and Z Linear Ways Manual X-Y-Z Fine and Fast Positioning Motorized, Programable Zoom Lens Cast Base and Mast Single USB Connection to Computer Calibrations Stored on Machine

Optics and Illumination

Non-Linear Compensation

InSpec measures and applies compensation for systematic variation and ensures the highest measuring accuracy for the machine. Non-linear calibration of the stage and optics is standard.

Advanced Lighting

The intuitive graphic interface controls long-life white LEDs. Enhance edges with full, ring, sector, and segment selections. InSpec includes automated light calibrations.
